# CURRENT PHYSICS INDEX (CPI)

First published just a few years ago, CPI is already a firmly established adjunct to hundreds of personal libraries and libraries serving the science community. A concise, concentrated guide to the vast output of the American Institute of Physics (AIP) literature, covering every current published article, CPI gives the substance of each piece, easy to grasp in a quick scan. You're able to determine immediately whether you've learned all you need or want to know, or whether you'd like more information (in which case you're directed straight to the source, the journal in which the complete article appears). If you don't have the journal and prefer not to use a library copy of it, it's possible to obtain a *reprint of the article*; a unique AIP service for science researchers, not offered by other index publishers.

## EIGHT GOOD REASONS FOR SUBSCRIBING TO CURRENT PHYSICS INDEX

1. Coverage equal to 90% of American Physics literature, 50% of Soviet and 25% of the world's.
2. Journal Coverage—each issue lists the 41 journals and AIP Conference Proceedings Series covered.
3. Detailed Key to Entries.
4. Up to the minute technology—quarterly CPI is ready for reference within weeks of the end of each quarter.
5. Author written abstracts—eliminates the kinds of errors that sometimes have slipped into other indexes.
6. 4 issues annually + 2 giant volumes—in-addition to the quarterly issues, at the year's end the total listings are brought together into 2 giant volumes.
7. Physics and Astronomy Classification Scheme (PACS)—adds to the efficiency and readability of the CPI system.
8. Price efficiency—a low \$95 a year. If you are a member of an American Institute of Physics Member or Affiliated Society, 4 quarterly + 2 annual volumes are yours for the incredibly low price of \$30 a year. (Foreign and air freight prices slightly higher).

## MORE AND MORE SCIENTISTS ARE TURNING TO CURRENT PHYSICS INDEX. HOW ABOUT YOU?
